

Laura Anderson, President and CEO of Aluminum Blanking Company, Inc., (ABC Co) leads a 37 year old family owned business, which is recognized for its deep heritage as the first dedicated processor of aluminum sheet in North America.

Twenty-seven years ago, Laura first joined ABC Co after years of leading aerospace engineering initiatives at Jet Propulsion Laboratory, Pasadena, CA. In 2004, Laura left ABC Co, after serving as Vice President of Systems, Quality and Engineering. She then filled a succession of leadership positions at tier-one automotive suppliers in the areas of six-sigma process improvement, logistics, and large-scale SAP implementation in supply chain planning and manufacturing. Beginning in 2011, Laura founded a consulting firm that specialized in providing world-class Quality, Information Technology, Manufacturing, Supply Chain Planning, SAP Implementation, and JIT System Roll-Out Project Management and Advisory services.

Laura rejoined ABC Co in 2014 as Executive Vice President of Operations, and was later promoted to President, CEO. She is very proud of the team at ABC Co and the legacy they have built on quality processing of aluminum blanks serving both commercial and automotive markets.

Laura has been married for 32 years, with four adult children, the youngest two still in college. She attended University of Michigan, Ann Arbor receiving degrees in Aerospace Engineering and Physics.
